Declaration of Conformity 2024 – Present

Certification A - TOPDON Declaration of Conformity

Those performing automotive glass repair, replacement, calibration, or recalibration services are to only use specifically designed equipment meant for the specific purpose of calibration/recalibration whenever such calibration/recalibration of the Advanced Driver Assistance Systems (ADAS) is required by the service specifications of the vehicle manufacturer.

TOPDON Response:

Each TOPDON calibration/recalibration system is manufactured to our own documented internal quality control process. Each internal quality control process utilizes equipment that is applicable and compatible with both the software and hardware associated with performing the appropriate calibration/recalibration.

Each TOPDON calibration/recalibration system (including software and hardware), when operated as designed and as directed, meets and/or exceeds the associated vehicle manufacturer’s documented calibration/recalibration requirements.

Certification B - TOPDON Declaration of Standard Conformity

TOPDON will make every good faith effort to be in ongoing compliance with the ANSI/AGSC/AGRSS 005-2022 Standard (or its most current iteration) set forth by the Auto Glass Safety Council.
